Boat Stacking Machine Mosman Boat Shed

The Space Saver Rowing Systems boat stacking machine has been structurally reviewed during the design process for a working load limit of 1000kg and an inspection of the installation has been undertaken at the Mosman boat shed.

The design has been reviewed in accordance with the following Australian Standards,

AS 1418.1 - 2002	Crane, hoists and winches General requirements.
AS 499 - 2004	Lifting devices.
AS4100 - 1998	Steel structures.

It is considered that the frame is structurally adequate for the design working load limit WLL of 1000kg and is generally in accordance with the requirements of the above standards.

Yours faithfully,

Brian Pratt BE. MIE. Aust.
